

## Newly Built Funeral Home Equipment Procurement List

The newly constructed funeral home in China is equipped with state-of-the-art facilities designed to cater to the diverse needs of mourning families and to ensure a dignified and efficient service. The equipment configuration is meticulously planned to cover various aspects of funeral services, from the mourning hall to the cremation area.

In the Mourning Hall, the facility provides a range of titanium viewing stands in different sizes to accommodate various requirements. The stands are equipped with advanced features such as double steps, railings, and fully automatic rotating mechanisms to facilitate smooth operations during the ceremony. Additionally, there are presiding stands, offering tables, and specialized vehicles for transporting the viewing stands, all designed with titanium for durability and elegance.

The Cold Storage Room is furnished with fully automatic rotating three-door freezers to preserve the deceased with utmost care. Large wheel carts and electric hydraulic lift trucks are available for convenient transportation of remains and equipment within the facility.

The Embalming Room is equipped with double airflow lift embalming tables, workbenches of varying sizes, and tool cabinets to support the embalming process. Mobile equipment carts are also provided for easy movement of tools and supplies.

The Mortuary Preservation Room houses multi-functional lift preservation tables and tool cabinets, ensuring that the bodies are handled and preserved with respect and professionalism.

The Dissection Room is fitted with advanced equipment such as the corrupt pathology double airflow cleaning lift dissection tables, which come with monitoring systems for detailed observation and recording. Pathology sampling tables, steaming and disinfection cabinets, and ventilated storage cabinets are also included to maintain hygiene and facilitate the work of forensic experts.

The Columbarium is designed with ash storage shelves in single and double niche options, crafted with a lotus marble imitation style for an aesthetically pleasing appearance. The shelves are available in quantities to meet the demands of the community.

Finally, the Cremation Area is equipped with luxury ash picking cremators and high-grade flat cremators, both designed for efficient and respectful cremation processes. The area also includes exhaust processors to manage emissions and underground flues for proper ventilation.

Additional equipment such as bone ash grinders and kang surface vacuum cleaners ensures that the cremation process is carried out with the utmost respect and cleanliness.

Overall, the equipment configuration of this new funeral home in China reflects a commitment to providing a comprehensive and high-quality service that honors the deceased and supports the grieving process of the families.

No.	Area	No.	Product Name	Unit	Quantity	Unit Price (Yuan)
1	Mourning Hall	1	Titanium Viewing Stand (Large) (5.1m*4m)  (Double-step, Double railing, Fully automatic rotating type)	Set	1
